TESTIMONIAL

Asthma. 76

Dear Sirs,

The reason why I am writing to you is my daughter, she has asthma. First, I would like to tell you that I have been an asthmatic person, from four (4) years until I was sixteen (16) years old. I never had asthma again, until I was thirtytwo (32) years old, at that time I was pregnant with her (five (5) months).

She was born January 10, 1983 and on December 20, 1986 she had her first asthma symptoms. She got it again in 1987 twice.

I moved to Florida from New York, where the climate is warmer. On January 24, 1988 we got here and five (5) days later she had her first asthma attack, again on March 22 and April 24, 1989.

Yesterday she started again. She is six (6) years old.

Approximately 15 years ago you send medication and suggestions to my sister Lucia Moreta in Aruba and she never has gotten asthma since then.

I am asking God that you will be able to send me something for her as soon as possible. At the same time I hope I can receive it.

After I receive it from you , I will write to you regarding myself.

Thanking you I remain,

Carmen Moreta-Rivera
