

Navijan Pharmaceutical Works.

Dear Sir: Greetings!

I'm writing you after eight years.

Thank you for the medicine that you send me, it helped me very well.

Sir: from the month of October 1989, I was not feeling well, so I went to the doctor for a check up, he told me that my kidneys was inflame he gave me some antibiotics, I took the treatment but still when I wake up in the morning my face around my eyes are swollen, also my hands and feet, I used to get fever during the night, then he send me to an internist which send me to the hospital they took several test during those 8 days, such as X-rays blood test and X-rays of my kidneys etc ect, all the test they made were good, after a few days I began to get fever again and my skin started to get a lot of sores my face especially, then he send me to make another blood test then he found out that I have a blood disease called, S.T.E. and he's giving me some medicine called, Prednisolon.

2

At times I feel very weak and he said that it is the bacteria that is found in pork, it is something like that, that is eating my blood cells, he told me not to eat meat, that I should eat more fish and chicken a lot of greens and fruits.

I'm writing you to see if you can help me, because the internist said that they can control the sickness, but there is no cure for it.

My age is 48 years, weight is 80 kilos
My height 5 feet 7. inches.

The last time I wrote you, my reference number was DR/453/81. I hope it will be of some help.

Thanking you in advance,

Yours Truly

Magdalena Teerdam.
